

Safe, Reliable, & Efficient

MedHaul connects healthcare organizations to high-quality non-emergency medical transportation (NEMT) providers, focusing on the specific needs of patients with chronic conditions, such as those undergoing **cancer care**.

MedHaul's services help **sustain improvements in cancer care outcomes** by minimizing transportation barriers, a known contributor to missed treatments, delayed care, and increased hospitalizations, thereby reducing disparities in access to timely, life-saving cancer treatment.

How MedHaul Works for Cancer Care Patients

1

Book a Ride

Input your patient's needs into the MedHaul platform.

2

Automatic Transportation Provider Matching

Our technology platform screens the transportation requirements of each patient, automatically matching them with a driver who is available and capable of meeting their needs.

3

Proactive Patient Reminders

Patient ride reminders are available in over 50 languages and are sent via text, automated calls, and/or email.

4

Patient Satisfaction Surveys

MedHaul requests and collects rider satisfaction data to constantly improve the patient experience.

Our technology streamlines the transportation process, offering healthcare providers a single platform to schedule and track rides, ensuring reliable access for patients receiving **life-saving preventions like screenings and treatments like chemotherapy or radiation** for same-day medical transportation requests or requests scheduled days, weeks, or months in advance.

Impact of Transportation on Patient Health

Mortality risk increases by up to

for individuals who delay cancer treatment by just one month.

Delays in medical treatment can lead to the progression of cancer and worse health outcomes while placing excessive strain on healthcare resources. Key issues that can be **positively addressed** through the use of an efficient NEMT service, such as MedHaul, include:

- Fewer missed appointments
- Avoiding unnecessary hospital costs
- Improving patient care quality
- Increasing patient satisfaction
- Strengthening post-acute care management

\$150B+
lost (annually)

by the healthcare industry due to missed appointments.

With MedHaul, Healthcare Organizations see

Fewer delayed or missed medical appointments

Less interrupted delivery of care

Better ability to comply with prescribed health management plans

Ease of adhering to scheduled follow-up appointments

Better health outcomes

Reduced use of emergency department care

Patient Satisfaction with MedHaul

4.9 rating out of 5

Patients often view the transportation offering as an extension of their clinical care.

Patients undergoing cancer-related treatments often have unique transportation needs, such as traveling with medical equipment or requiring stretcher transport. MedHaul offers a **variety of vehicle types** to meet these requirements, ensuring safe and comfortable transport for all patients.

Ambulatory

For individuals who are able to walk and do not need equipment to travel, or those who only need basic assistance.

Ambulatory Assist

For individuals who need help getting out of their home, into the vehicle, and inside the building for their scheduled appointment.

Wheelchair Assist

Vehicles with either a lift or ramp for individuals that use wheelchairs including:

- Standard wheelchairs
- Motorized wheelchairs
- Wheelchairs wider than standard width
- Bariatric patients

Stretcher Ride

Safely transport bed-bound individuals who need stretcher transportation services.
